

Things to Know

Before your Cleaning Appointment

Additional Site Preparation

Our Technicians need at least 3 feet of clearance around each air vent.

If you make us aware of hidden vents concealed by carpets or large furniture, we are happy to help where we can, without compromising the safety or our employees or your property.

Winter Temperatures

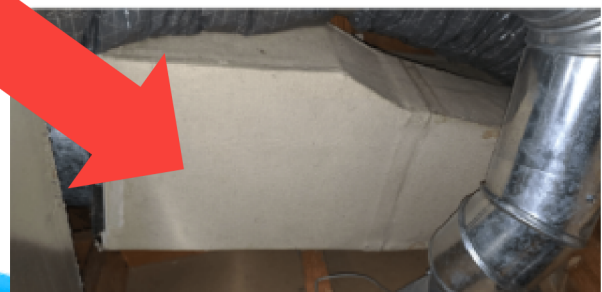

The indoor temperature of your home may change during the cleaning process. Please move temperature sensitive items away from the door.

Asbestos

Asbestos can be a serious health and safety issue if disturbed. As per OH&S Guidelines, we are not permitted to perform duct cleaning services on those vents that have uncontained asbestos tape.

Please give our office a call or text photos to 780-413-1655 if you believe you may have asbestos tape on your duct work.

Please note: you may be charged a \$100 Service Fee if you do not notify us of asbestos on your duct work ahead of your appointment.

Please reach out if you have any questions - call or text 780-413-1655
